

OneStep Electronic (2006 Model)

If you are looking to begin a professional disc repair service for up to 50 discs a day, the TDR OneStep is the solution. This reliable machine with low operation costs repairs even heavily damaged discs, achieving results that your customers will not believe. Turn disc repair into a new income opportunity! (While repairing your own discs for pennies...)

✚ Main features

- one stage
- simple operation
- virtually no training needed
- small dimensions
- starter pack of consumables supplied with machine
- discs come off needing just a wipe
- average disc repair time 3 to 5 minutes
- electronic time setting
- two preset times which the user can change
- counters for machine usage (total and resettable one)
- sound signal for the end of the cycle

- ➔ The OneStep is an ideal solution for both starting a new repair business and upgrading from micron-paper based disc repair machines. No more changing papers, no more changing pads! This machine will fix all discs in one smooth step, saving money, time and space. Its small footprint of only 30x30cm will fit on every counter top space without requiring any plumbing or external bottles. The OneStep will remove even the deepest scratches while leaving the surface of the disc looking truly brand new!
